---

Done, I'm not totally positive about the Iron listing....but I seem to recall that it was incorrect locational info. When I go to find the original data in my files (that I got from DEQ), it doesn't exist for that site for any of the databases.

**Subject:** corrections to ODEQ additions

Hi Gretchen,

Can you please take a look at the "EPA Corrections to ODEQ additions" file in :

G:\\Baker\\Water and Watersheds\\Watershed Unit\\303d List Approvals & IR\\OR 2012

And add a column at the end explaining why we don't think it should be added. I think all but one are biocriteria listings that didn't have enough critters, but the last one is a toxic one I'm not sure about. There's only 11 total. Thanks, and if you can just let me know when you've had a chance to do it, that would be great. Thx.

jill
